# AUTOMOTIVE & AEROSPACE QMS

Achieve sector-specific certifications that unlock supply-chain partnerships in the automotive and aerospace industries.

## AS 9100

*Aerospace Quality Management*

AS

The globally recognised QMS for aviation, space, and defence organisations. Required by major aerospace OEMs and primes, AS 9100 builds on ISO 9001 with additional aviation-specific requirements for safety, reliability, and airworthiness.

Flight-safety & airworthiness focus • Risk & opportunity management • Configuration & change management • Supply-chain control requirements

## IRIS

*International Railway Industry Standard*

IRIS

IRIS (ISO/TS 22163) is the quality management standard for the railway industry, covering the complete railway supply chain from system design through maintenance. Recognised by UNIFE and major railway operators globally.

Rolling stock & component quality • RAMS (Reliability, Availability, Maintainability, Safety) • LCC – Life Cycle Cost management • Project & product management

# MEDICAL & LABORATORY STANDARDS

2 Services

## NABL – ISO 17025

*Laboratory Competence Standard*

LAB

The international standard for testing and calibration laboratories. NABL accreditation based on ISO 17025 demonstrates technical competence, measurement traceability, and reliable results — mandatory for regulatory and commercial recognition.

## ISO 13485

*Medical Devices Quality Management*

MED

The international standard for quality management systems specific to the medical devices industry. Required by regulatory bodies worldwide and by customers in the medical device supply chain, covering design, production, and post-market surveillance.

# FOOD SAFETY MANAGEMENT

*Safeguard your food supply chain with GFSI-benchmarked and HACCP-based systems that protect consumers and build brand trust.*

## FSMS ISO 22000

International standard for food safety management systems along the entire food chain.

## FSSC 22000

GFSI-recognised food safety certification scheme based on ISO 22000+ sector-specific PRPs.

## HACCP

Hazard Analysis Critical Control Points — the cornerstone systematic preventive approach to food safety.

## BRCGS Food

British Retail Consortium Global Standard — mandatory for major UK/EU retailers and global brands.

## BRC-IOP

BRC Global Standard for Packaging & Packaging Materials — for packaging supply chain quality & safety.

## FAMI-QS

European quality & safety assurance scheme for feed additives and premixtures for animal nutrition.

## SQF

Safe Quality Food — GFSI-recognised programme for primary production through manufacturing.

## AIB International

AIB Consolidated Standards for Inspection — widely used in food manufacturing and distribution.

## GMP

Good Manufacturing Practice — baseline requirements for food production facilities globally.

# ENERGY MANAGEMENT

*Reduce energy consumption, lower operating costs, and meet sustainability targets through structured energy management.*

## ISO 50001

*Energy Management System*

The international standard for establishing and improving energy management systems, helping organisations use energy more efficiently, cut costs, and reduce emissions. Based on Plan-Do-Check-Act.

Energy performance indicators • Energy baseline & targets • Action plans & monitoring • Legal compliance & reporting

## Energy Audit

*Comprehensive Energy Audit*

Systematic examination of energy flows in buildings, processes, and systems to identify opportunities for energy conservation. Includes BEE-compliant, investment-grade, and walkthrough energy audits.

Energy consumption analysis • BEE-compliant audits • Investment-grade reporting • Renewable energy roadmap

# IT / ITES MANAGEMENT

**4 Services**

## ISO 27001

Information Security Management System — protect data assets and demonstrate security governance.

## ISO 20000

IT Service Management System — deliver managed IT services with internationally recognised quality.

## CMMI

Capability Maturity Model Integration — process improvement framework for software and services.

## SOC 2

Service Organisation Control 2 — assurance for data security, availability, and confidentiality.

# BUSINESS CONTINUITY & RESILIENCE

*Build organisational resilience with frameworks that ensure continuity of operations during disruptions and crises.*

## ISO 22301

*Business Continuity Mgmt*

The international standard for Business Continuity Management Systems (BCMS). Helps organisations prepare for, respond to, and recover from disruptions including natural disasters, cyber-attacks, and pandemics.

## ISO 55001

*Asset Management*

Systematic management of assets to realise their value. Helps organisations optimise asset lifecycle costs, manage risk, and improve performance across physical, infrastructure, and IT assets.

## ISO 31000

*Risk Management*

The international standard providing principles, framework, and process for risk management. Applicable to any organisation regardless of type, size, or sector — the universal language of risk.

## ISO 39001

*Road Traffic Safety Mgmt*

Road traffic safety management system standard for organisations that interact with the road transport system. Reduces fatalities and serious injuries from road traffic accidents.

## ISO 28001

*Supply Chain Security*

Security management system for the supply chain — best practices for implementing, maintaining, and improving supply chain security. Recognised by customs authorities globally.

## ISO 21001

*Educational Organisations*

Management system standard for educational organisations — enhancing satisfaction of learners, other beneficiaries, and staff through effective application of the system.

# CORPORATE SOCIAL RESPONSIBILITY

*Demonstrate ethical governance, environmental accountability, and social responsibility through recognised CSR and sustainability frameworks.*

## ISO 26000

Social responsibility guidance standard

## SA 8000

Social accountability — ethical working conditions

## GOTS

Global Organic Textile Standard certification

## SEDEX

Supply chain ethical trading data platform

## EcoVadis

Sustainability rating for global supply chains

## GRI Reporting

Global Reporting Initiative sustainability reports

## BRSR Reporting

Business Responsibility & Sustainability Report

## CBAM

Carbon Border Adjustment Mechanism compliance

## ISO 14067

Carbon footprint of products — quantification

## FSC

Forest Stewardship Council certification

## R2

Responsible Recycling for electronics

## GHG Accounting

Greenhouse gas inventory & reporting

## ISO 20400

Sustainable procurement guidance

## Wrap

Worldwide Responsible Accredited Production

## ISO 37001

Anti-bribery management systems

# OUR SERVICE APPROACH

## 01 Gap Analysis

Comprehensive assessment of current practices vs. standard requirements. Detailed report with findings and recommendations.

## 02 Documentation

Develop quality manual, procedures, work instructions, forms, and records tailored to your organisation.

## 03 Implementation

Hands-on support deploying the management system across all relevant processes and departments.

## 04 Internal Audit

Conduct thorough internal audits and management reviews to verify compliance and system effectiveness.

## 05 Certification

Full support through Stage 1 and Stage 2 certification audits — addressing NCRs and ensuring first-time pass.

## 06 Training

Awareness training, internal auditor courses, and lead auditor programmes for your team.
